Hu-Friedy’s comprehensive line of endodontic instruments and accessories give you versatile options to meet all of your clinical needs. Many of our instruments, especially those made for microsurgical applications, were developed in conjunction with leading global Key Opinion Leaders who are on the cutting-edge of clinical research, design and application. If you are looking for exceptional instrument design, quality and reliability, and unmatched customer service, choose Hu-Friedy’s Endodontic Instruments.

**MICRO MIRRORS**
Exceptionally small mirrors with rhodium coating to resist scratches.

**RUBBER DAM CLAMP FORCEPS**
A popular rubber dam clamp accessory, Rubber Dam Forceps feature a useful attachment design which makes it easy to pick up and place rubber dam clamps.

**RUBBER DAM CLAMS**
Matte or Black Line finish on rubber dam clamps helps to absorb and dissipate light instead of reflecting.

**PROCEDURAL KITS**
Precreated kits for common procedures to streamline and simplify your setups.

**ENDO MICRO SURGICAL**
Instruments designed specifically for use with microscopes during endodontic microsurgical procedures.

**NICKEL TITANIUM ENDODONTIC SPREADERS**
Nickel Titaniuim Endodontic Spreaders provide extra flexibility and “memory” while the ergonomic, color-coded Satin Steel handles provide maximum comfort, control and easy identification.

Visit our Endo Essentials page to see everything online: www.Hu-Friedy.com/EndoEssentials
ENDODONTIC MICROSURGERY

Hu-Friedy has an extensive line of apical hand instruments. This includes curettes, explorers, condensers, burnishers and mirrors. Many were developed in conjunction with Hu-Friedy Key Opinion Leader, Professor Marwan Abou-Rass and other leading global innovators.
Hu-Friedy has a large assortment of microsurgical mirrors to choose from. Select from single instruments or choose the mirror you want and team it up with a handle of your choice. The rhodium-coated front surface mirrors offer sharp, scratch- and distortion-free visibility.

**VELVART**

They are made from highly polished stainless steel, come in round or rectangular shapes, are single or double-ended, and are offered in a variety of sizes.

**FRONT SURFACE RHODIUM-COATED**

Micro Mirror®
Round 3 mm  | MM4

Micro Mirror®
7 mm x 2 mm  | MM7

Micro Mirror®
9 mm x 3 mm  | MM8

Micro Mirror®
Round 5 mm  | MM5

*Mirror Handle sold separately, Mirror Handle options include: 10-130-70, 10-130-08, SHDPV, SHTMBH, MBW wrench required for assembly.

Handles of the MM1, MM2 and MM3 are marked with one, two or three bands for easy identification.
Curette in straight and angled forms, and useful sizes. Straight curettes provide controlled straight line access and good visibility; use angled forms to access difficult or confined areas.

*The terms “Curettes” and “Excavators” are interchangeable.*
Hu-Friedy’s large selection of microsurgical explorers are available in various designs and working ends, giving the clinician useful options for exploration and treatment. From the basic and popular MEX1, to Professor Abou-Rass’ excellent assortment of explorers, they all provide the balance, fine design and construction that practitioners need for careful yet thorough apical exploration.

1 Abou-Rass | MAR-EX1
A versatile explorer with two different, useful and sharp working ends.

2 Abou-Rass | MAR-EX2
A single-ended bone file styled explorer used to enlarge the opening made by MAR-EX1 into the cortical bone to allow drainage.

3 Abou-Rass | MAR-EX3
A probe with one blunt flat and one round end; excellent for taking measurements, especially the direct root length of the apex.

4 Abou-Rass | MAR-EX4
Its straight, sharp working end is ideal for penetrating small osseous defects in cortical bone.

5 Abou-Rass | MAR-EX5
A 45° angled explorer used to check dentinal defects, such as root caries, root resorption and fracture lines.

6 Abou-Rass | MAR-EX6
A 90° angled, sharp-pointed explorer useful for detecting apical foramen and apical seal quality.

MICROSURGICAL
DR. MARWAN ABOU-RASS
EXPLORERS
Designed in conjunction with Professor Abou-Rass, these double-ended instruments are perfect for retrofill applications. They are double-ended with one round and one oval tip. Round working tips produce “pot hole” preparations while oval tips make “isthmus” designs.

.8 mm
2 mm

*The terms “Condensers” and “Pluggers” are interchangeable.
This family of ball burnishers is available in straight and angled forms. Straight designs provide direct, straight access with ease and visibility. The angled forms have long shanks for optimal reach and visibility of the working end.
Khayat Retrofilling | PFI8ABK6
This versatile Khayat filling instrument has one angled and one straight spatula end. Useful for complex, deep apical treatments.

Khayat Plugger | PLGBK6
The Khayat Apical Plugger, with its 4.5mm and 6.0mm working ends, is ideal for packing retrofilling materials. It was specifically designed for use in deep canal preparation.

PERMA SHARP GENERAL TISSUE PLIERS

Khayat | TP5072
The Khayat The Perma Sharp Tissue Pliers combine the advantages of “plain” carbide inserts in limiting soft tissue trauma with the ergonomic benefits of a sculpted handle.

PERMA SHARP CASTROVIEJO NEEDLE HOLDER

Khayat | NH5021RC
The Perma Sharp Castroviejo Needle Holder combines a curved beak with the maneuverability provided by its round handle. (Recommended for suture sizes 5.0, 6.0, 7.0.)
Dr. Bertrand Khayat's Endodontic Surgery Kit includes a specifically designed apical plugger and retrofilling instrument which allow clinicians better access during the surgical procedure.

All instruments sold in full kit sets are also available for individual purchase.

*Kit includes hinged instrument clips.*
MICROSURGICAL PROF. KHALID S. AL-FOUZAN

PERIOSTEAL ELEVATORS

Al-Fouzan

HMPAF1
Two bends special designed small oval shaped periosteal elevator with reduced working ends, allowing the instrument to reach difficult areas, particularly indicated for elevation of interdental papilla in the interproximal areas without traumatizing the tissues during flap elevation.

Al-Fouzan

MPAF3
Two bends periosteal instrument elevators with medium and large oval shaped ends, enabling delicate periosteal tissue retraction and better control over the instruments.

Al-Fouzan

MPAF3
Two bends periosteal instrument elevators with medium and large oval shaped ends, enabling delicate periosteal tissue retraction and better control over the instruments.
MICROSURGICAL CURETTES

Three angulated curettes useful for curettage of granulomatous tissue, cyst removal and debridement of surfaces difficult to reach. Furthermore, they can decorticalize the defect bone walls exposing the narrow cavities, improving the osteogenic potential of the defect.
ENDODONTIC EXPLORERS
Special designed endodontic explorer comes in two different sizes and a thick shaft to minimize bending of the instrument under pressure providing optimal tip performances. It also comes with sharp tips which improves sounding of the bone and helps in perforating through the lesions, it can also be used for canal orifice detection during conventional root canal treatment.

MICROSURGICAL RETROGRADE ENDODONTIC EXPLORERS
Sharp 90° angled retrograde endodontic explorer which comes in two different sizes, enabling the reach of difficult retrograde surfaces. It improves detection of the retrograde canal orifice and provides optimal ultrasonic tip performances.
Special designed double ended small and medium retrograde pluggers with one angulated tip useful to reach difficult orifices. Straight ends are used for direct access orifices retrofill condensation.

Double ended off set-angled instrument with flat end allowing easy adaptability of the retrograde filling material, providing increased access and better visibility, with a spherical round end for burnishing retrograde material in place.
These versatile double-ended instruments combine a condenser on one end and a ball burnisher on the other end. The plugger ends feature universal, right and left designs and come in small, medium and large sizes.
**RETROFILLING**
Hu-Friedy has several double-ended apical filling instruments to choose from.

**LEFT APICAL**
| MRFL
The left of two paired instruments that are used for filling, condensing and burnishing.

**RIGHT APICAL**
| MRFR
The right of two paired instruments that are used for filling, condensing and burnishing.

**VELVART**
| PLGVEL56

**PLUGGERS**
These pluggers give the clinician very different working ends for enhanced maneuvering and versatility.

**1** | PLGRF1
- .80 mm
- .33 mm

**2** | PLGRF2
- 1.10 mm
- .25 mm

**DOUBLE ENDED EXPLORER**
These pluggers give the clinician very different working ends for enhanced maneuvering and versatility.

**EXPLORER**
| MEX1
A popular, basic apical explorer used to initiate the tracking groove in the root tip, and for general exploration and probing.
Basic Endodontic Kit
| ENDOKIT.

EXPLORERS

Hu-Friedy's endodontic explorers are made from a special blend of alloy which provides the flexibility, strength, tactile sensitivity and resilience clinicians need when exploring and assessing the treatment site. They are available in several double-ended designs and handles.
Hu-Friedy’s endodontic excavators feature extended-length shanks and are meticulously handcrafted from the highest grade stainless steel. They help the clinician access the pulp chamber for easy and efficient removal of dentin. The result is a superior clinical outcome and improved efficiency.
ENDODONTIC ACCESSORIES

In addition to critical procedural instruments such as spreaders, pluggers and rubber dam clamps, endodontic accessories, the "staples" of the office, are available to complete the line-up of Endo Essentials.

Hu-Friedy manufactures a wide variety of spreaders, all handcrafted from the finest stainless steel to precise specifications. Choose from NiTi spreaders, ISO sized spreaders with color coded handles for easy identification, heat carriers, and a variety of other popular spreaders. Our spreaders help the clinician gain access into the most difficult canals for optimal compaction of filling material during lateral condensation.
ISO Spreaders have an ISO color-coded band on the handle for ease of identification during usage: #30-Blue, #40-Black, #50-Yellow, #60-Blue

*DI=Diameter of instrument 1 mm from the tip. These measurements (i.e., .30) appear next to the tips of the instruments.
NICKEL TITANIUM ENDODONTIC SPREADERS*

Nickel Titanium, or NiTi, points provide these spreaders with extra flexibility and “memory” while the ergonomic, color-coded Satin Steel handles provide maximum comfort, control and easy identification. Choose from nine popular designs.

HEAT CARRIERS*

*DI=Diameter of instrument 1 mm from the tip. These measurements (i.e., .30) appear next to the tips of the instruments.
PLUGGERS

When performing vertical condensation, choose from ISO-sized anterior or posterior options, Machtou, the Glick Blade/Plugger or other options. These pluggers are handcrafted to exact specifications using the finest materials.

Hu-Friedy rubber dam clamps are made in the USA from proprietary Satin Steel for corrosion resistance, superior strength, and a fine balance between flexibility and memory. The matte finish we apply to our clamps absorbs and dissipates light instead of reflecting it back, so you can experience a comfortable field of vision that is easier on the eyes - to help you perform at your best.

Learn more about our Black Line Rubber Dam Clamps at www.Hu-Friedy.com/BlackLineRDC
RUBBER DAM CLAMPS OPTIONS

Our rubber dam clamps are available in both Black Line and Standard Matte finishes.

PREMOLARS

- **0X**
  - RDCM0X | RDCM0
  - Flat jaws and high bow for longer premolars.

- **1X**
  - RDCM1X | RDCM1
  - Slightly festooned jaws for upper premolars.

- **1AX**
  - RDCM1AX | RDCM1A
  - Deeply festooned jaws for canines and premolars.

- **2X**
  - RDCM2X | RDCM2
  - Flat jaws for premolars.

- **2ASX**
  - RDCM2ASX | RDCM2AS
  - Flat serrated jaws for larger premolars.

- **29X**
  - RDCM29X | RDCM29
  - Flat jaws for lower premolars.

- **27NX**
  - RDCM27NX | RDCM27N
  - Slightly festooned jaws for premolars.

- **W2X**
  - RDCMW2X | RDCMW2
  - Slightly festooned jaws for premolars.

- **209X**
  - RDCM209X | RDCM209
  - Small, flat jaws with stiff bow for lower premolars.

ANTERIOR

- **106RX**
  - RDCM106RX | RDCM106LX
  - Flat jaws and high bow for small lower canines and first premolars.

- **00X**
  - RDCM00X | RDCM00
  - Flat jaws and high bow for small lower canines and first premolars.

- **9X**
  - RDCM9X | RDCM9
  - Offset flat jaws and stiff bow for anterior teeth.

- **9SX**
  - RDCM9SX | RDCM9S
  - Offset flat serrated jaws for anterior teeth.

- **6X**
  - RDCM6X | RDCM6
  - Slightly offset jaws for labial caries on anterior teeth.

- **212X**
  - RDCM212X | RDCM212
  - Flat jaws for labial caries on anterior teeth.

- **212SAH**
  - RDCM212SAH | RDCM212SAX
  - Slightly offset staggered jaws for odd shaped anteriors.

- **29X**
  - RDCM29X | RDCM29
  - Flat jaws for lower premolars.
The matte finish reduces operatory light reflection for a comfortable field of vision that is easy on the eyes so you can perform at your best.
