How the best perform

CORPORATE EDITORIAL

Since 1908, Hu-Friedy has been putting the highest quality and most innovative dental products in the hands of dental professionals worldwide. And today as one of the world's leading dental instrument and product companies we continue our commitment to advance dental performance by supporting these products with world class service, education and peer communities.

We're committed to making sure the best perform that way.

A WORLDWIDE FOCUS ON QUALITY

Hu-Friedy is based in Chicago and has been privately owned by the Saslow family since 1958.

Today we employ over **700 talented and committed employees** with a sales force covering **more than 25 countries** – including **international offices and distribution centers in Milan, Frankfurt, Shanghai, Tokyo and Tuttlingen.**

DOWNLOAD OUR CATALOGUE

For all of us at Hu-Friedy, this is much more than a book that contains the highest quality dental instruments and products. It's a manifestation of the dedication, innovative spirit and hard work of a company that has served and supported the dental community for over 110 years.

CUTTING-EDGE CLINICAL SOLUTIONS

CHECK OUT WHAT'S NEW
IN HU-FRIEDY FAMILY!

For more than one hundred years, Hu-Friedy has led the dental industry through **technological innovation**.

We consistently collaborate with **research centers, universities, and key opinion leaders** to understand the emerging needs of practitioners, to stay at the forefront of the latest dental technologies and methodologies, and to develop new and ever-better products

NEW TITANIUM IMPLANT SCALERS

PERFORM AT YOUR BEST with Hu-Friedy's new, state of the art line of Titanium Implant Scalers. Made from the same titanium alloy as implants and abutments, these scalers are expertly designed and manufactured for implant maintenance, debridement, biofilm removal and can be used both supra and subgingival.

- **Improved visual acuity** with Hu-Friedy's signature Teal colored Anodized Titanium
- **Optimized sharpness** with cutting edges that are finely honed and sharpened post Anodization process
- **Enhanced instrument characteristics** for Implant maintenance with the ability to remove calculus and biofilm
- **Increased instrument value** with the ability to be sharpened at any time to extend the useful life of the instrument
- **Ergonomic sensitivity** featuring our Ergo handle that offers a large diameter and cross/hatch design for maximum tactile grip and support

RUBBER DAM CLAMPS

Hu-Friedy's 48 clamps, made in the USA from proprietary stainless steel, provide full-mouth coverage.

POINTS OF PERFORMANCE

- Satin Steel® which resists corrosion while aiding in flexibility and memory
- A dark coating allowing for improved intraoral contrast and visual acuity
- Matte finish for decreased light reflection and glare

For complementary products, see page 16.

EVEREDGE® 2.0

THE MOST ADVANCED SCALER EVER

STAYS SHARPER EVEN LONGER

EverEdge 2.0 uses a new, optimized heat control process in order to maintain the hard, sharp edge. This heat control, plus several manufacturing intricacies in Hu-Friedy's proprietary process, provide the durability needed for effective procedures and continued use.

UNCOATED PERFORMANCE

Similar to the original EverEdge technology, our proprietary processing ensures that the superior edge retention & wear characteristics of EverEdge 2.0 will last the entire life of the instrument. Since it's not a superficial coating, these characteristics can't be sharpened or scraped away. EverEdge 2.0 scalers can be resharpened at any point to extend their life.

REVOLUTIONARY TESTING SYSTEM

Hu-Friedy has invested in a custom blade evaluation system to ensure clinicians are receiving the sharpest possible instruments. Blades from every batch of EverEdge 2.0 are tested right off the factory line to confirm that the sharpness value remains in our target range, averaging 5 newtons of force required to cut the test material.

NEW FINELY-HONED FINISH

EverEdge scalers are sharp...EverEdge 2.0 scalers are even sharper. Using an enhanced finishing process, Hu-Friedy's professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

DIAMOND KNURL METAL HANDLE

The same EverEdge handle you love! The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

What will the newest, most advanced, sharpest and longest-lasting scaler on the market do for you?

Help you perform better than ever...

CHU'S SET

Complete Satin Smooth handle set of Chu's Aesthetic Gauges used for quick, accurate measurements during a crown lengthening procedure.

- Provides quick, accurate diagnosis of tooth proportion
- Provides accurate results and reduces chairside adjustment time
- Easy to read - reduces visual fatigue
- Results in effective communication to reduce the incidence of errors, and repeated adjustments
- Compatible with IMS cassettes and can be easily sterilized along with other instruments
- Reduces incidence of cross-infection

ORTHODONTIC LINE

VALID FOR ALL PART CODES OF ORTHO STANDARD PLIERS & CUTTERS

CUTTERS

With our diamond-honed cutting edges and orbit-formed joint, you will experience sharp and accurately-aligned cutting edges for every procedure, every time.

For each individual area of focus, we provide a specifically engineered cutter. To meet these stringent standards, all of our blades are hand-finished to maximise cutting performance for the appropriate wire size.

Universal Cut & Hold Distal End Cutter, Long Handle,
wire size <= .012" to .021"x.025"
(.30 - .53x.64 mm)
678-101L

UTILITY PLIERS

Strong, yet lightweight and perfectly balanced, the dimensions of these instruments are perfectly proportioned, they fit your grasp with unsurpassed ease.

Designed to provide superior control with effortless versatility, Hu-Friedy's Utility Pliers assure comfort to both you and your patients.

Slim Weingart Plier,
wire size <= .030"
(.76 mm)
678-202

WIRE FORMING PLIERS

These instruments perform as natural extensions of your professional artistry.

Our impeccably smooth finished tips allow you to bend the wire without risk of damage. Whether you are shaping stainless steel or nickel titanium, Hu-Friedy has a hand-finished, precision instrument to help bring your brilliant workmanship to life.

Tweed Loop Forming Plier,
wire size <= .022" x .025"
(.56 x .64 mm)
678-306

DID YOU KNOW?

All hinged instruments – forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. – should be kept lubricated. Regular use of proper lubricants, like Hu-Friedy Penetrating Oil (IPS) and Instrument Lubricant Spray (ILS), will prevent rust, corrosion and stiff joints to ensure smooth operation. **All hinged instruments should be sterilised in the open position.**

Perma Sharp needle holders

feature tungsten carbide inserts with a matched diamond-cut pyramidal profile for enhanced longevity, a secure, positive suture needle grasp and reduced risk of cutting the suture material.

With a precision designed hinge, the smooth surface reduces the risk of catching and or cutting the suture material during the knot tying process, enhancing clinical efficiencies.

For optimal grip and control, Hu-Friedy offers a variety of design options, including standard, finger and palm controlled closure.

INSTRUMENT MANAGEMENT SYSTEM AND INFECTION PREVENTION

CHOOSE TO WORK SMARTER, NOT HARDER

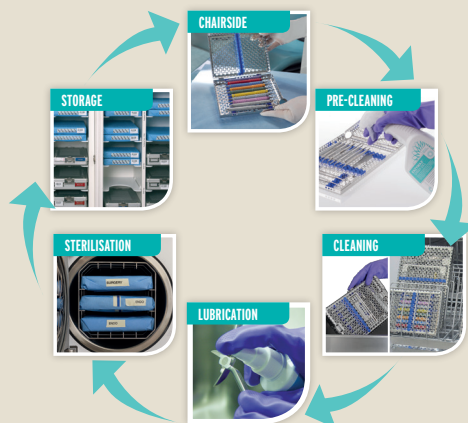

Hu-Friedy's **Instrument Management System** is the most comprehensive, reliable, and complete instrument processing and infection control system on the market today. IMS combines **sterilisation, storage and organization** of instruments in one **integrated system**.

Hu-Friedy's IMS system allows you to focus on your patients rather than wasting valuable time looking for the instruments to complete a procedure.

INSTRUMENT MANAGEMENT SYSTEM IMS INFINITY CASSETTES

Why using IMS Solution?

- Enhanced chairside efficiency and easy training with standardised procedural set-ups incrementing the productivity
- Reduced set-up time with organised storage of instruments within procedural labelled cassettes
- Entire cassette can be placed into Thermo-disinfector, ultrasonic bath and autoclave
- Reduced need for manual sorting of instruments into pouches
- Cleaning time reduced, allowing for a more productive team.

IMS SPORE CLEAR SURFACES DISINFECTANT

This one-step formula **cleans and disinfects** critical workspaces **within 1 minute of contact**.

It offers a fast, simple and effective answer to creating a safe work environment protecting dental staff and their patients from harmful pathogens. **Sporeclear** is **non-alcohol based, free of aldehydes, chlorine, phenols, peroxide and nonylphenol ethoxylates**, (NPEs), making them **compatible with all washable surfaces**.

INNOVATION BY OUR KEY OPINION LEADERS

The collaboration of the most **influential dental professionals** along with our world class team of engineers working together to develop the products of the future is the secret of our **continuous innovation** that, combined with the talents of our team, allows us to **anticipate the needs of our customers** in every country and build a customised solution, unique to their individual requirements.

OUR KEY OPINION LEADERS PROFESSOR ANTON SCULEAN KIT

Professor Anton Sculean, DMD, MS, PhD

Prof. Anton Sculean is professor and chairman of the Department of Periodontology at the University of Berne in Switzerland.

He has been the author of more than 200 publications in peer reviewed journals. He is on the editorial board of more than 10 dental journals amongst others the Journal of Clinical Periodontology, Clinical Oral Implants Research, Journal of Periodontal Research, Clinical Oral Investigations and Clinical Advances in Periodontics. He is Associate Editor of Quintessence International and Section Editor of BMC Oral Health.

Dr. Sculean served from 2009-2010 as president of the Periodontal Research Group of the IADR and is currently president of the Swiss Society of Periodontology. He has also written a total of 12 chapters in periodontal textbooks and has delivered more than 300 lectures at national and international meetings.
