Magneto

Our ultrasonic inserts combine the power, efficiency, and comfort you need to treat a wide range of patients. Available in a variety of different options for tip design, handle style, frequency, and water delivery method, HuFriedyGroup ultrasonic inserts allow you to perform at your best.

Swivel Inserts

Swivel inserts with 360° rotation give you the maneuverability and adaptability you want when power scaling. With a slight rolling motion of your fingertips you can eliminate the “start, stop, readjust, start” routine required with traditional inserts.

Piezo

Piezoelectric ultrasonic scaling, the dominant technology around the world, is renowned for the gentle yet efficient treatment that it delivers. Discover how PIEZON® Technology combines the comfort of piezoelectric scaling with advanced features to elevate your performance and your patients' experience at the same time.

EMS PIEZON® Devices

Increase your productivity and patient satisfaction with the EMS PIEZON® devices. Remove hard calculus and other mineralized deposits with superior efficiency and comfort thanks to the thin, robust and lightweight PIEZON® handpiece. Six LED lights are located around the tip of the handpiece to illuminate the oral cavity for 20 seconds, making plaque easily visible.

Piezo

PIEZON® 250

The PIEZON® 250 offers cutting-edge design and has received one of most recognized industrial design awards, the Red Dot Award. The most evident design feature, the control sphere for regulating power, offers little resistance when touched and yet its rotation is precise and finely attuned to the pressure applied by the intuitive one-finger control element. The PIEZON® 250 also has an easy-to-fill liquid container and features an independent water supply system, offering the possibility of adding different types of liquids for a variety of therapies. The device conveys a compact and functional design for an intuitive use and high standards of hygiene.

PIEZON® 250

[FT-224#HF/A/001](#)

PIEZON® 150

The PIEZON® 150 is the first of its class when it comes to direct-waterline devices. It carries the standard PIEZON® module with an ultrasonic performance of 32,000 linear oscillations per second, providing an efficient calculus removal and maximum precision. It has a compact design, taking up very little space in the office, with an intuitive power-control interface.

PIEZON® 150

EMS PIEZON® Handpieces

The PIEZON® handpieces brings our customers unparalleled ultrasonic quality, new levels of dexterity, speeds in oscillation that are redefining industry standards and more; all with a minimal-invasive capability.

Learn more about our
PIEZON® Handpieces.

PIEZON® LED Handpiece

The PIEZON® handpiece product range brings an unparalleled ultrasonic quality, new levels of dexterity, speeds in oscillation that are redefining industry standards and more; all with a minimal-invasive capability. A state-of-the-art piezoceramic disc technology enables all PIEZON® handpieces to deliver unsurpassed levels of precision and linear oscillation.

In addition to an ergonomic design with a pen-style grip, its lightweight body and slender nose-tip provide greater maneuverability and superior access. PIEZON® handpieces have a built-in 5,000 Kelvin LED light to secure bright natural daylight and exclusive surgical-grade stainless steel PIEZON® instruments with jewel-grade polishing.

AIRFLOW[®]

Air polishing is a procedure which uses air & water pressure to deliver a controlled stream of specially processed powders in a slurry through the handpiece nozzle.

Fine particles of powders are propelled by compressed air in a warm spray and directed onto the surfaces of the teeth. This pressurized jet of air, water and powder removes surface stains, plaque and other soft deposits such as food particles trapped in between the teeth.

But AIRFLOW[®] Therapy isn't a typical air polishing treatment. Forget the messy, uncomfortable treatments you've given up on and explore the benefits AIRFLOW[®] can bring to your patients and your practice.

EMS AIRFLOW® Devices

AIRFLOW® devices are the most advanced and versatile air polishing systems in the world. They are designed with the highest standards of performance, safety and comfort in mind, being specifically built to cater to execute Guided Biofilm Therapy.
